

WebXR Instructions

Run the following [link](#) on your device browser and select the AR or VR mode given at the bottom.

You can arrange the furniture in the given space. The Chair and the side table of the bed are grabbable.

Oculus - Select the VR mode and use the hand controllers to grab and place the furniture in the virtual space.

Mobile - Select the AR mode and add overlay to your real world. You can pick up furniture by putting the fingertip over the object without losing contact and drag left or right and drop it anywhere in the VR room.

Devices:

HMD - Oculus (VR mode)

Android - Chrome browser (AR mode)

*In some cases, the device may ask to update the browser, ARCore, or VR drivers.
